*Sčítání a odčítání zlomků
se stejným jmenovatelem*

$$\frac{2}{6} + \frac{1}{6} = \frac{2+1}{6} = \frac{3}{6}$$

$$\frac{1}{4} + \frac{2}{4} = \frac{1+2}{4} = \frac{3}{4}$$

$$\frac{1}{5} + \frac{2}{5} + \frac{1}{5} = \frac{1+2+1}{5} = \frac{4}{5}$$

$$\frac{3}{4} - \frac{1}{4} = \frac{3-1}{4} = \frac{2}{4}$$

$$\frac{9}{10} - \frac{2}{10} = \frac{9-2}{10} = \frac{7}{10}$$

$$\frac{7}{8} - \frac{4}{8} - \frac{1}{8} = \frac{7-4-1}{8} = \frac{2}{8}$$
